ACKNOWLEDGE

As we understand eProject is another way to learn by building a website that is 80-90% similar to the websites many companies have. It was a project where we had to execute the processes as if we were building a website that our client wanted. The benefits of doing take part in this project are:

- ✓ Being able to make a plan for the whole process
- ✓ Enhance skills and value
- ✓ Have the opportunity to find more ways to build a website in a more minimalist way
- ✓ Improve group-work skill
- ✓ Learn how to express what we do in our project through words
- ✓ Work on real-life projects
- ✓ Able to use a different program to design layout
- ✓ Understand how important self-learning is during the main course

We want to thank our professor, Ms. Pham Thi Lanh who supported us during the project when we had any problems.

During the project, we made several mistakes and that is an enormous experience for us to widen our knowledge in web development.

Last but not least, we extremely appreciate that India Aptech has allowed us to study and do this project. We will take advantage of this opportunity to learn as much as we can and do our best so that in the future, we will be able to succeed and proud that we are studying at Aptech.

SYNOPSIS

This project is given to students who have completed the HCJS and AJS courses. However, during the activity, students were able to find and use more languages that support us to gain more information.

The objective of this program is to give a sample project of working on a real-life project. We have to make a plan and follow it step-by-step to get the result and understand how important to work as a team to create a useful and large website.

Before starting to take part in the process, students have to be able to use HTML, Javascript, and AngularJS to build the web. Another no less important is understanding English so that can get what the project required and do the report.

During the development, students need to update the process frequently and come to lab sessions with the assistant based on the schedule. Also, the report is required.

After finishing the website, the advantages that students will take are:

- ✓ Understand the process of building the website
- ✓ Able to express logical things through words by giving presentations and writing report
- ✓ Can write the essay to express what have done
- ✓ Have experience in web development
- ✓ Team-work experience

REVIEW 1

Problem Definition

Cambridge Hospital is one of the famous hospital in the town since 1928, now the hospital organization wish to change their existing website completely. The website which they demand is suppose to provide user friendly environment and navigation. The important menu must be stated in the top section of the webpage. Also a decent look out and color combination is expected.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Customer Requirement Specifications

LAYOUT

- The Home Page should be created with proper sections, graphics and with a suitable logo
 - Videos of important inventions should be included (size limit should be considered)
- Link on the home page must be included: Home, About us, Gallery etc
 - Each category mentioned above should brief user about respective topic.
- Must be made user friendly and uniformity in the color combination must be maintained.
- Navigation of the project must be made smooth.
- Must have Site Map

WEBSITE SHOULD INCLUDE

- How and when Nobel Prize awards started
- Various fields in which Nobel prize is awarded
- Nominations in all field in all years
 - Details of winners along with their career brief to be included.
- Related news
- Related event
- Gallery
- FAQs

HARDWARE/SOFTWARE REQUIREMENT

Hardware

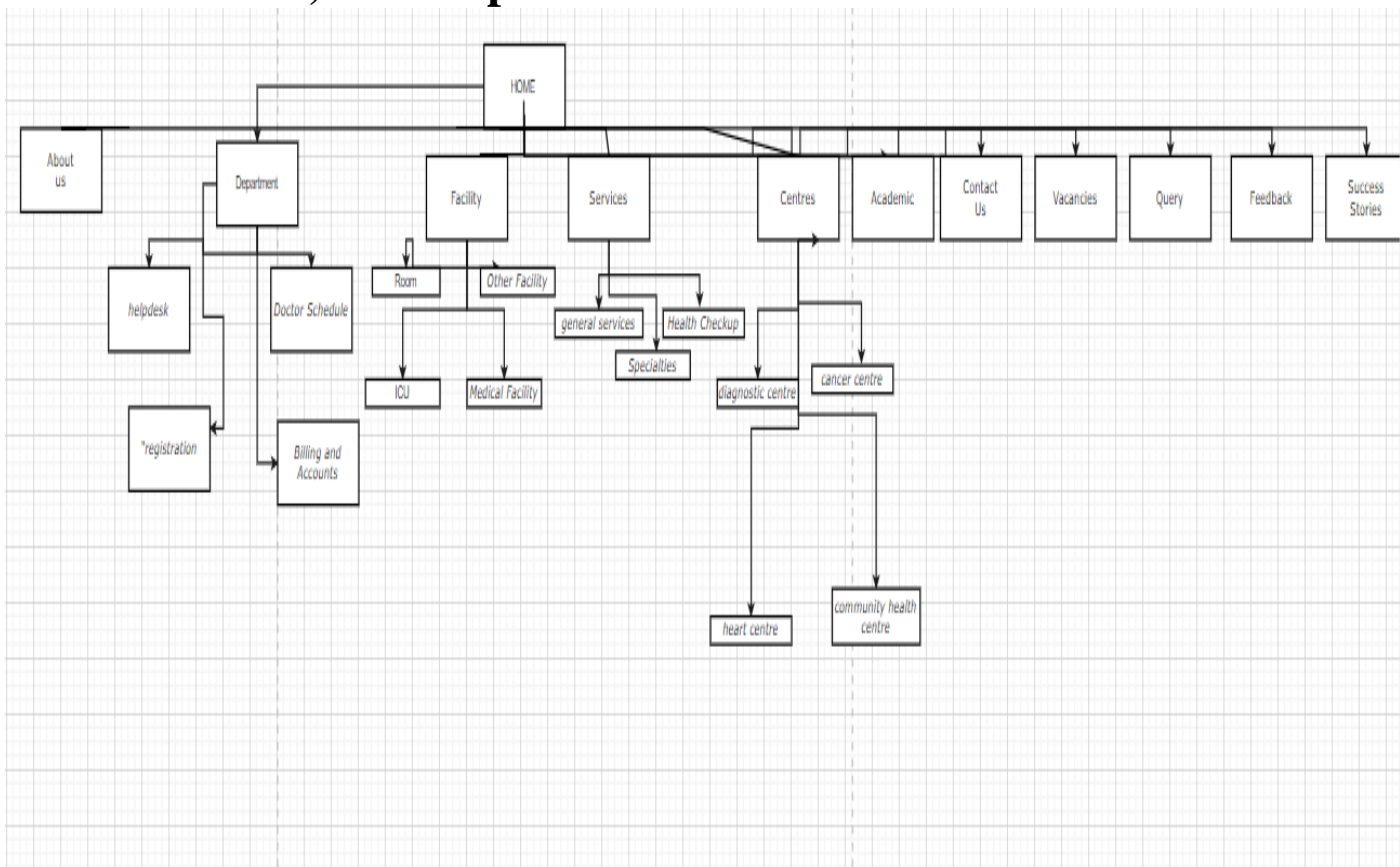

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better

Software

- Notepad/HTML editor
- Dreamweaver
- IE 5.0/ Netscape 6.0

Architecture and Design of the project

1) Site map

2) Screen shots

- 1) **Description:** This is a *Home* page of HOSPITAL, at the header area which is on the top contain the logo of the website and the name. Right below that area is the navigation bar which have “About us”, “Department”, “Facility”, “Services”, “Centres”, “Academic”, “Contact Us”, “Vacancies”, ”Query”, Feedback”, “Success Stories”.

. In the main part of this page, first area will be the slider about some images which are related. Below that which be the other slider but this one will contain the videos. Also on the right slide, there will be the sidebar where we put some

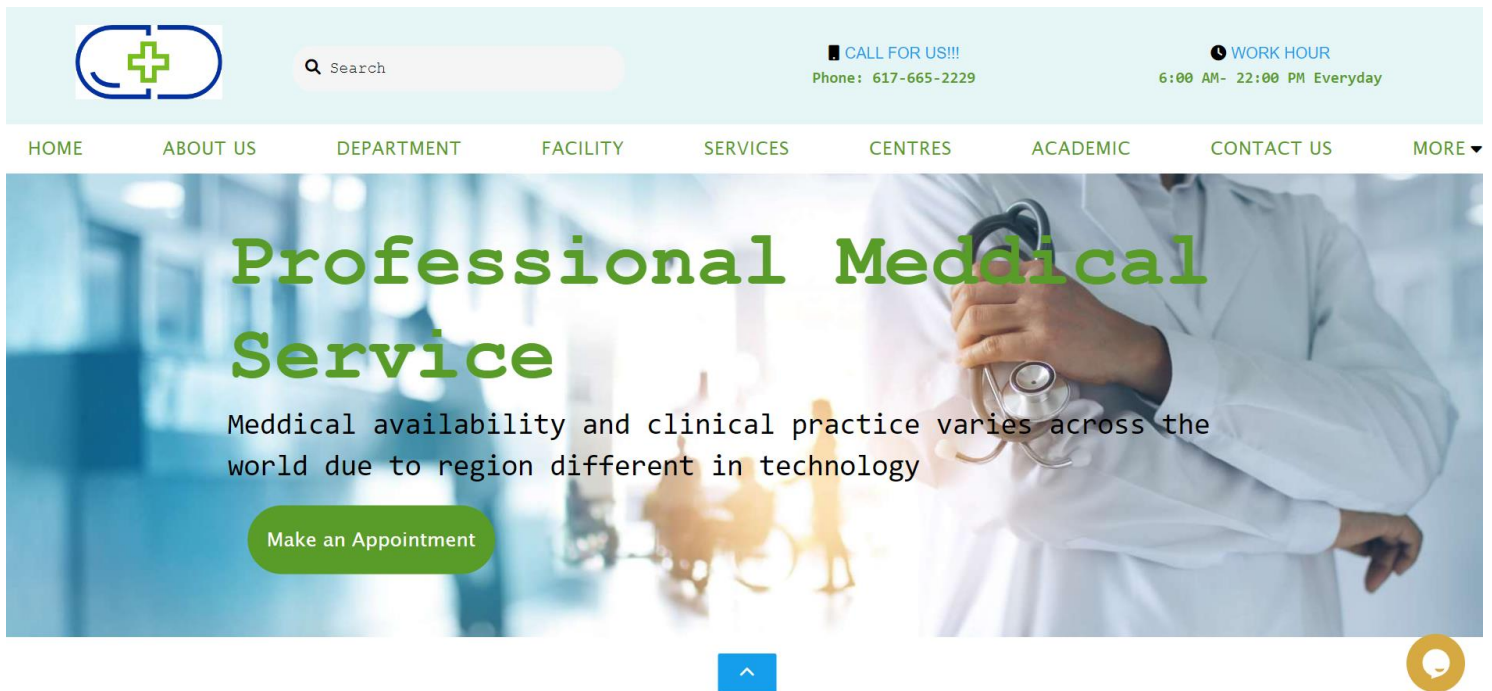

news in that area. Finally, in the footer, the information about the website, way to contact, feedback area will be there.

Task Sheet

| Project Ref No. | Project Title – The Nobel Prize | Activity Plan Prepared by | Date of preparation of Activity Plan | | | |
